

DESIGN & **MANUFACTURING** PROCESS

- ◆ Our team will provide initial budgetary pricing based on your design requirements.
- ◆ Our engineering team will meet with you to review budgetary pricing and design requirements.
- ◆ We will provide you with a detailed proposal that includes final pricing and a manufacturing schedule.
- ◆ You will be provided with a contract. Once this is signed, the design process will begin.
- ◆ Our team will submit engineering documents for your review and feedback.
- ◆ If required by the state where your building will be installed the necessary documents will be submitted to the MIB review board.
**Skids are not included*
- ◆ Assembly of building modules will be scheduled based on lead times of the equipment and materials involved.
- ◆ To ensure the highest standards are met, prior shipment, thorough quality control and testing will be conducted in our modular facility.
- ◆ Your module will be carefully prepared and protected for shipment.
